“SAVING VALUABLE MINUTES ON AIR”

GINA HEMS is a smart application designed to help Helicopter Emergency Medical Services in the air.

The system communicates with the operation center and provides pilots and Technical Crew Members with various management and decision support tools during all phases of flight.

GINA HEMS no installation needed, system is certificated for in-flight use (on board use).

GINA HEMS

FIRST RESPONSE INTERVENTION SYSTEMS

BEFORE TAKE OFF

- ETA and course visualized based on your location
- Automatically receive a HEMS dispatch call
- Statuses are not dependant on radio signal
- Real time tracking for all cooperating units
- AirNav Pro integration
- Possibility to call the announcer directly

DURING THE FLIGHT

- Real time location and adaptive ETA (3, 5, 10 min.)
- Online updates on scene situation
- Coordination with other involved units
- Six map sources
- Automatic map source based on zoom level (terrain - buildings - orthophoto)
- Integrated airspace traffic
- Integrated meteo radar
- Chat for fast communication with other units and operation center
- Offline search engine (helipads, crossroads, traumapoints, all cities, online search and combinations)

TECHNOLOGY

Apple iPad

AirNav Pro navigation

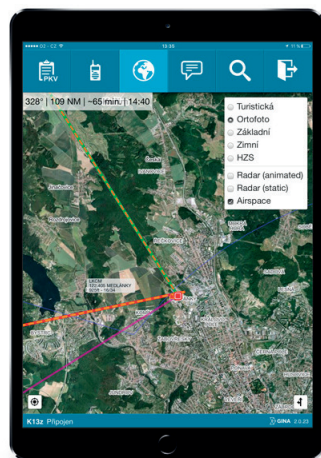

SSL channel (AES 256-bit), ISO27001 Infrastructure

Telephone network (GSM module), GPRS optimized

Offline work mode (maps, databases)
